DATA VISUALIZATION PORTFOLIO

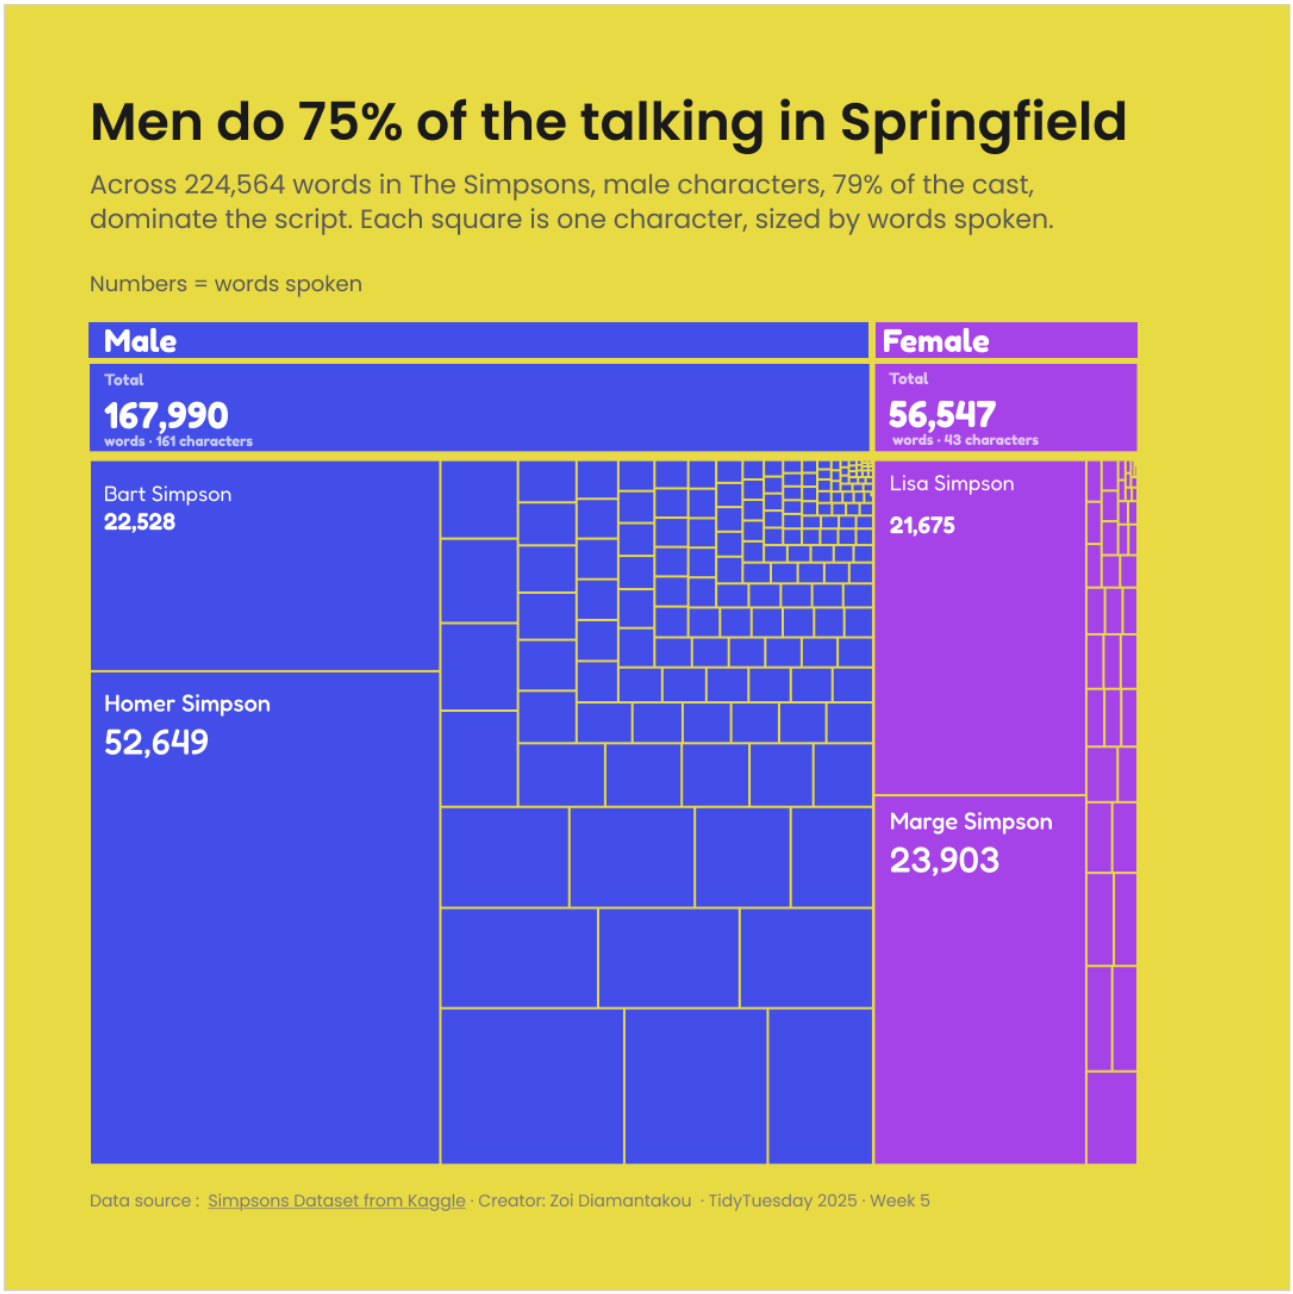

Three years of data, one chart at a time

A selection of seven charts from 60+ visualizations I made for #TidyTuesday, the weekly open-data challenge from the R community. Each one is built in R; most are finished in Figma. Every chart starts with one question and ends with one clear answer.

INSIDE

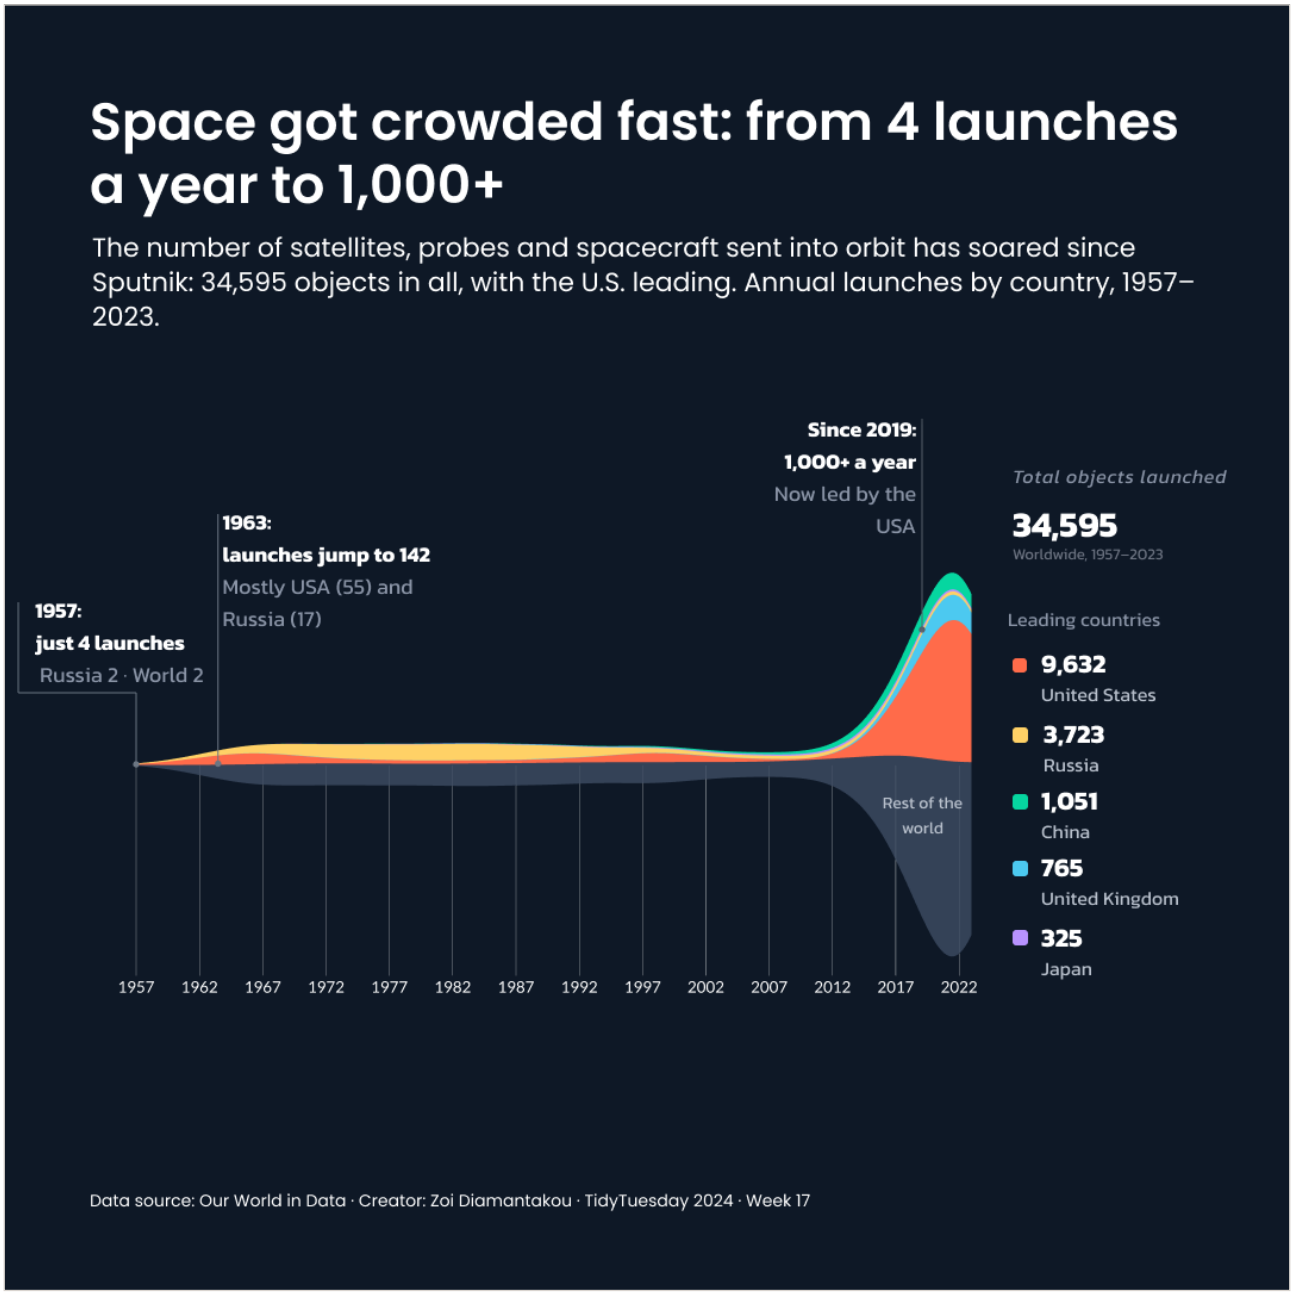

02 Men do 75% of the talking in Springfield
03 Space got crowded fast
04 Being 8,000 m tall isn't enough
05 Hamlet never stops talking
06 The planet has warmed sharply since 1980
07 Fewer than 1 in 5 of rock's 'greatest albums' are by women
08 Over 250,000 Americans live without plumbing

Who gets the lines? Male characters are 79% of the cast and speak three of every four words. Lisa and Marge alone account for a fifth of all dialogue.

DATA Simpsons dataset (Kaggle)
CHART Nested treemap, grouped by gender

Annual launches went from 4 in 1957 to more than 1,000 a year since 2019, with the United States now leading by a wide margin.

DATA Our World in Data
CHART Annotated streamgraph

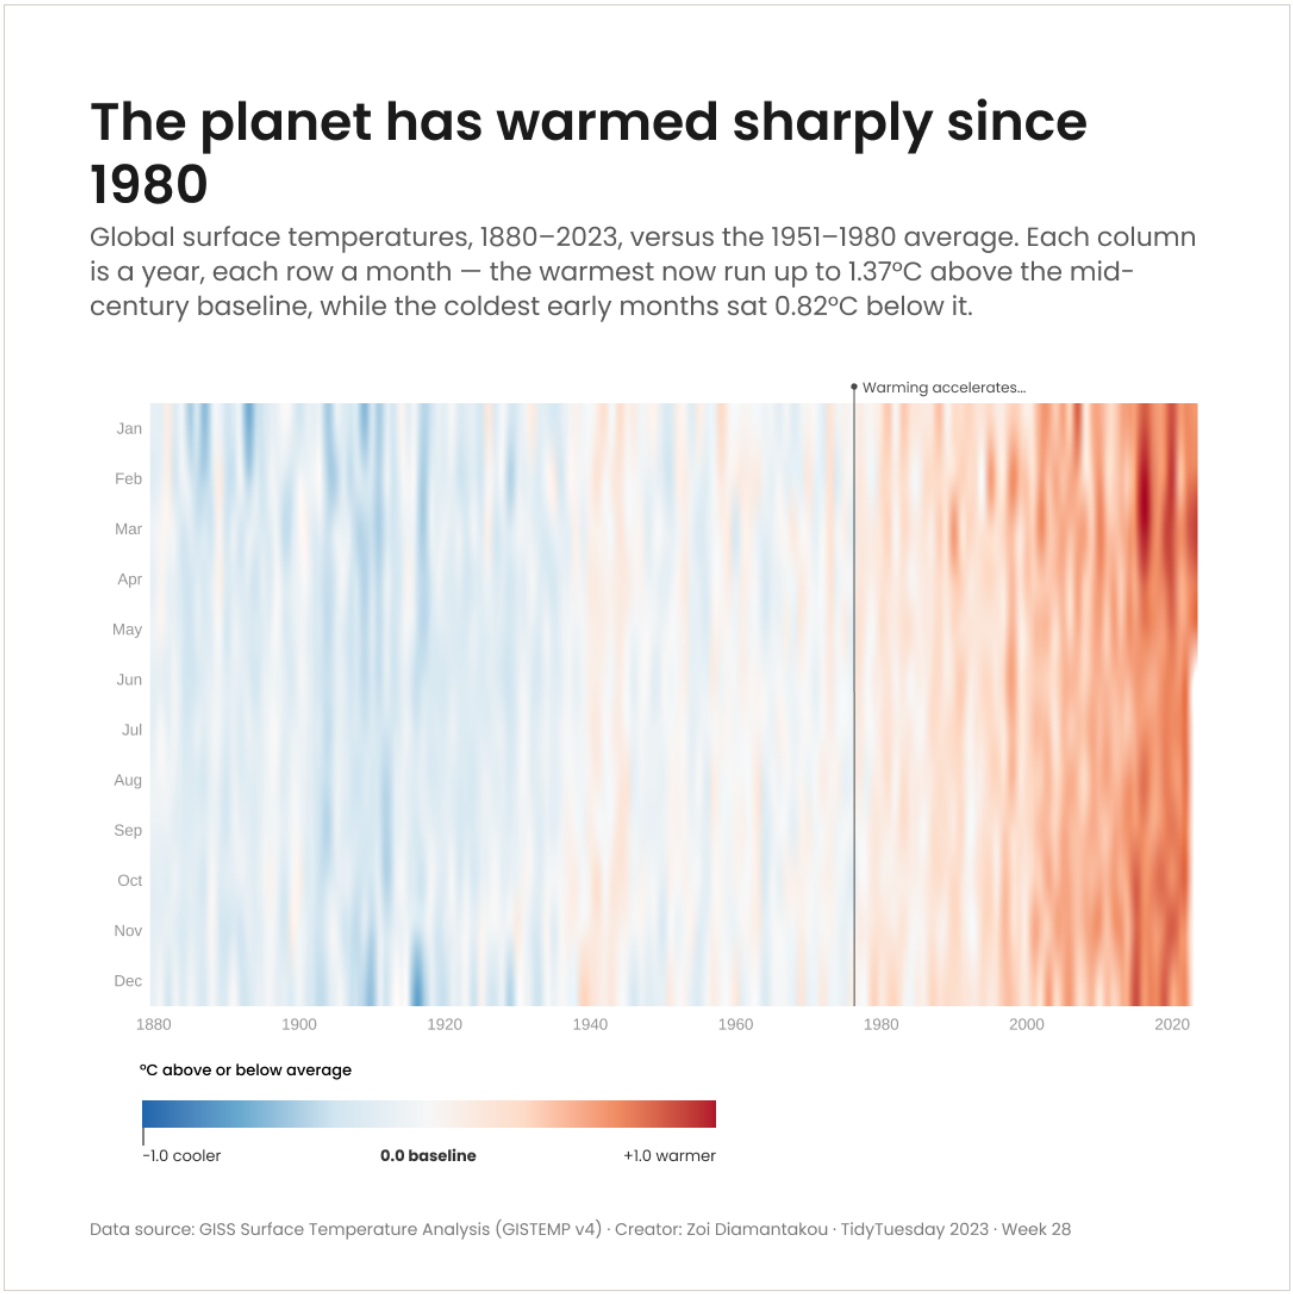

Of 16 summits above 8,000 m in the Nepal Himalaya, eight saw no expeditions at all in 2020–2024. Fame, not height, decides where climbers go.

DATA The Himalayan Database
CHART Custom glyph chart with annotations

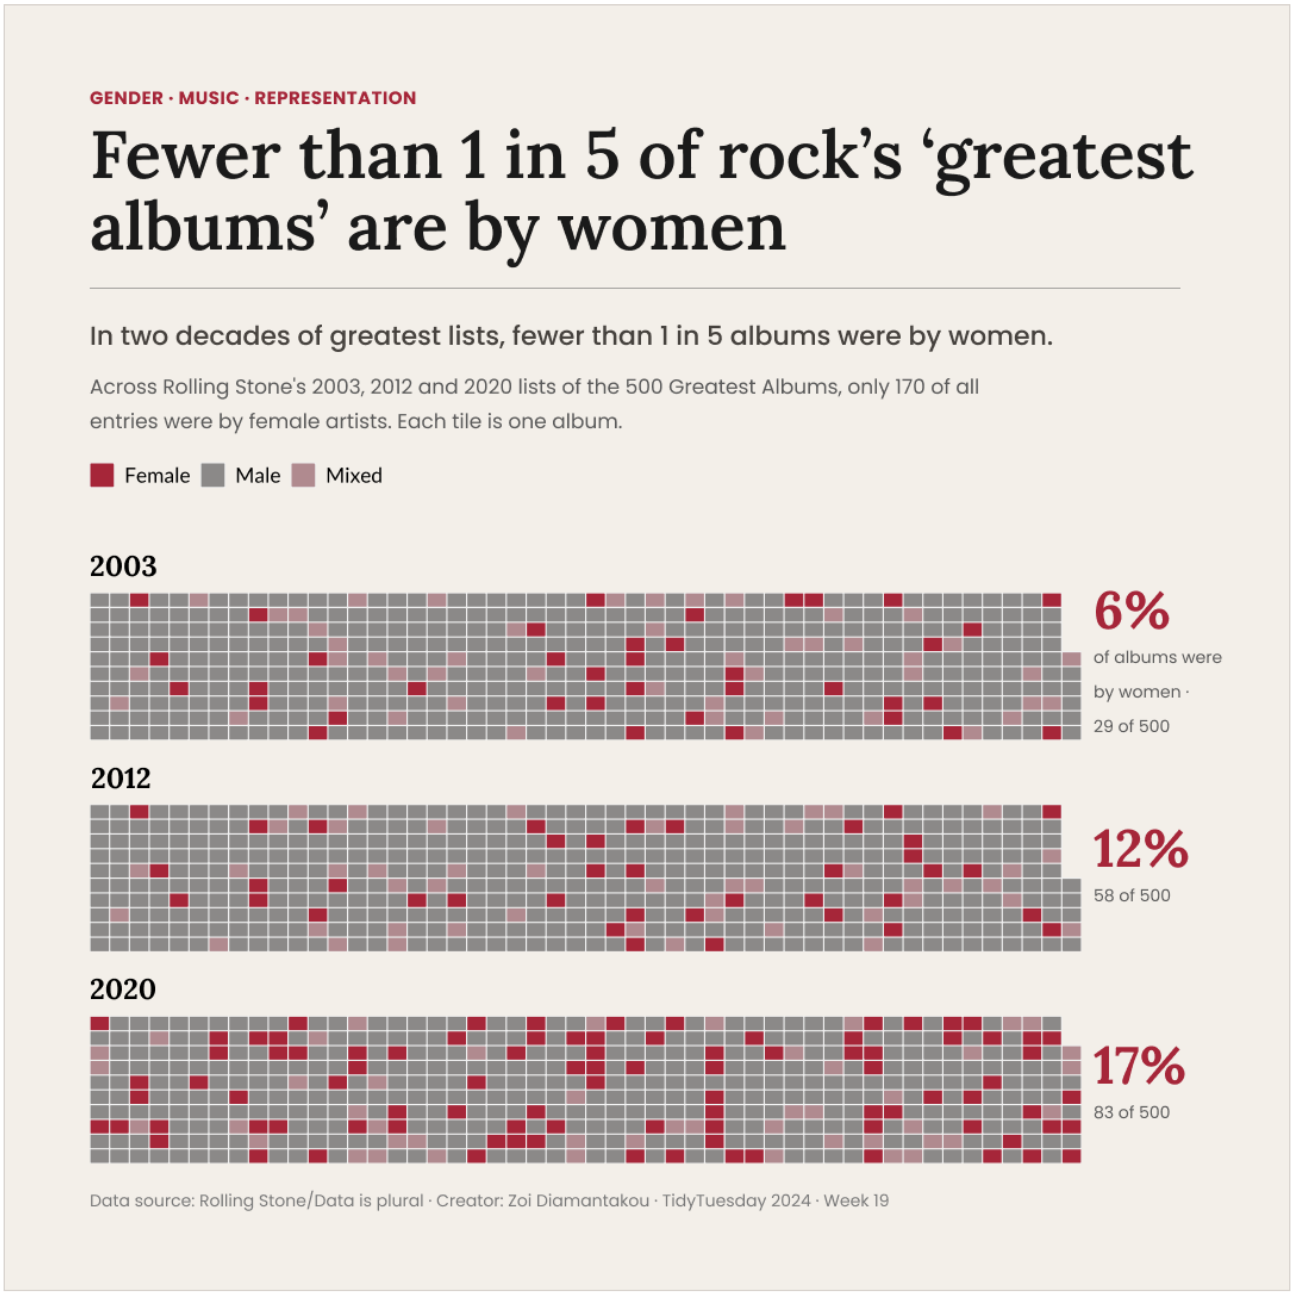

Across Hamlet, Macbeth and Romeo & Juliet, a handful of lead characters carry most of the lines. Hamlet alone speaks 11,543 words.

DATA shakespeare.mit.edu
CHART Voronoi treemap with icon bars

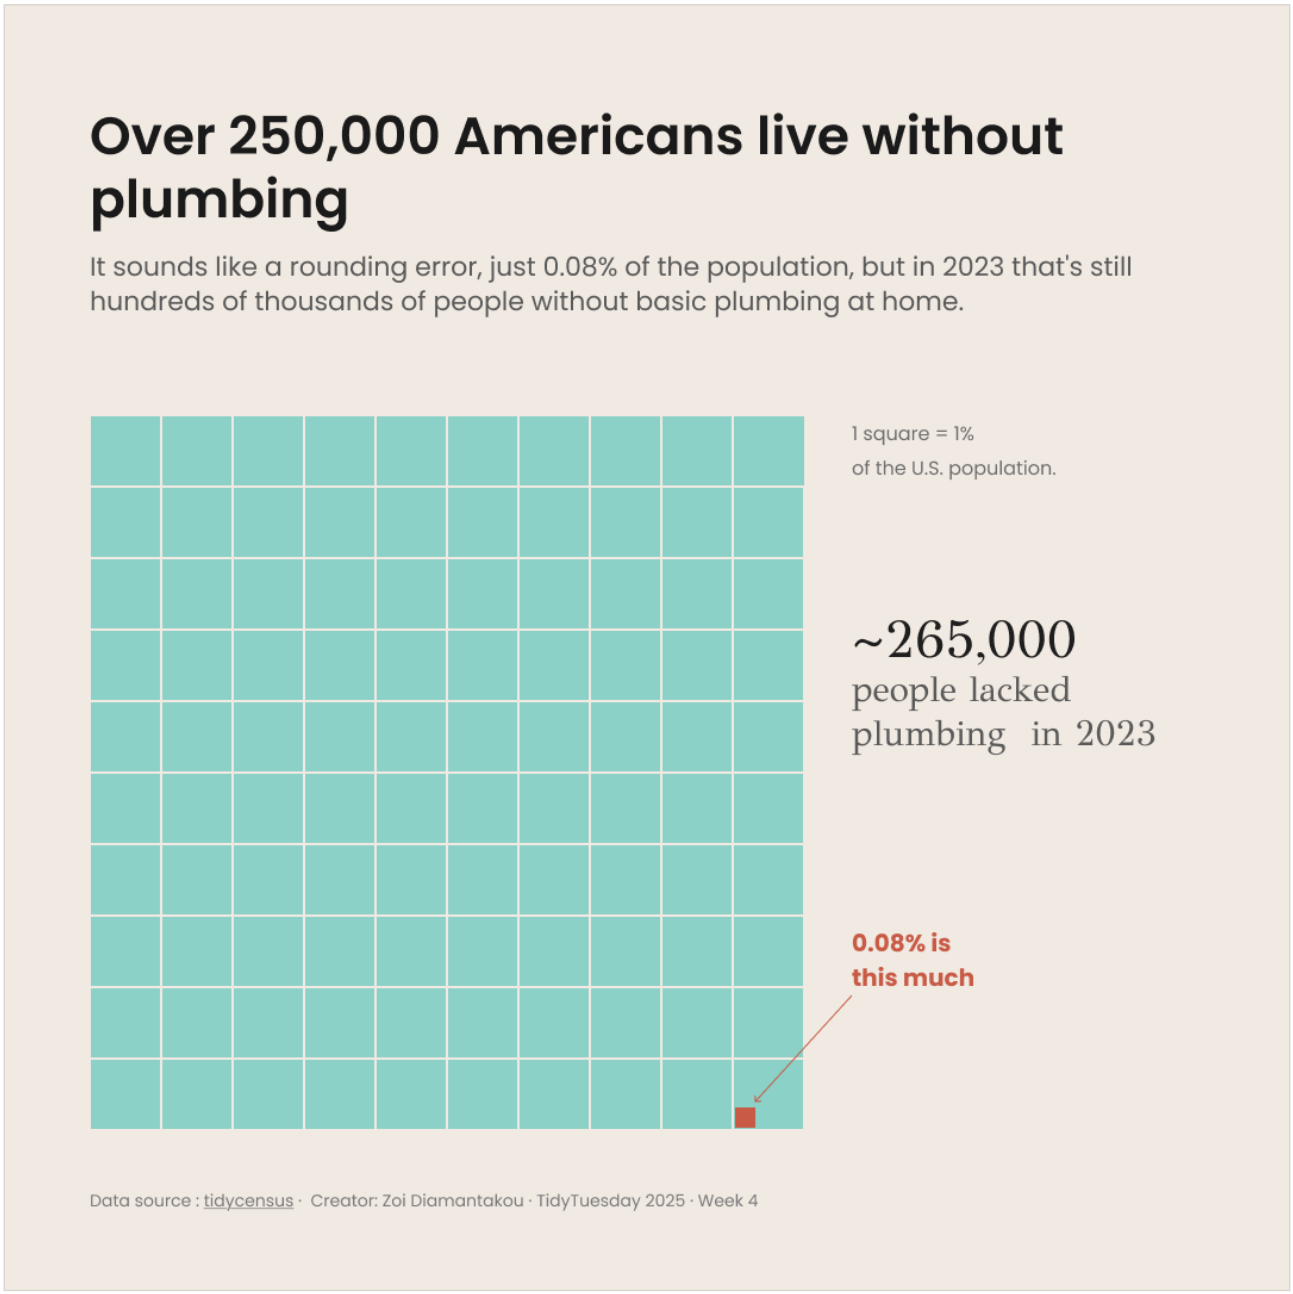

Every month of every year since 1880, against the 1951–1980 baseline. The shift from blue to red after 1980 needs no explanation.

DATA NASA GISS Surface Temperature Analysis (GISTEMP v4)
CHART Month × year heatmap, diverging scale

Across Rolling Stone's 2003, 2012 and 2020 lists, only 170 of 1,489 albums were by women. The share rose from 6% to 17%, but it is still far from parity.

DATA	Rolling Stone / Data is Plural
CHART	Waffle chart, one tile per album

0.08% sounds like a rounding error. In 2023 it meant roughly 265,000 people without basic plumbing at home.

DATA U.S. Census Bureau via tidycensus
CHART 10 × 10 waffle, one square = 1%

SEE THE CODE

Every chart, every script, open on GitHub.
